## Personal Summary

As a diligent and motivated master's student specializing in data analysis, I am equipped with a solid foundation in statistical methodologies, data mining, and predictive modeling. Through rigorous coursework and hands-on projects, I have honed my skills in data manipulation, statistical analysis, and data visualization. Skilled in data collection, cleansing, analysis, and creating insightful visual reports to support data-driven decision-making. Strong communicator with a track record of translating complex data into actionable business insights. Eager to apply my evolving expertise to real-world challenges, I am poised to contribute to innovative and data-driven solutions in a professional setting.

## Skills and Competencies

- Statistical Analysis
- Data Management, Security and Privacy
- Data Visualization and Interpretation
- SQL, SSMS, Power BI, Power BI Service, DAX Functions, Tableau, Python, R
- Panda, Numpy, Warehouse, Azure Databricks
- Microsoft Excel, MS Word, MS PowerPoint
- SQL Server, T-SQL, ETL
- JavaScript, HTML, GitHub
- Communication and team collaboration

## Education

<b>MSC</b>	<b>Trent University</b> , Big Data Analytics	Jan. 2024 to May 2025
	• GPA: 93/100	
<b>BSC</b>	<b>University of Benin</b> , Engineering	Jan. 2013 to May 2017
	• GPA: 4.5/5.0	

## Experience

<b>Kuehne + Nagel S.A.R.L.</b> , Data analyst Intern	Luxembourg
<ul style="list-style-type: none"><li>• Collected, cleaned, and processed large datasets from multiple sources to ensure data accuracy and integrity.</li><li>• Conducted exploratory data analysis to identify patterns, trends, and insights using statistical methods and data visualization techniques to support business decisions.</li><li>• Maintained automated data pipelines for efficient data extraction, transformation, and loading (ETL) processes using SQL and Python</li><li>• Created interactive dashboards and reports using Power BI, DAX Function and Power BI Service to visualize key performance indicators (KPIs) and communicate findings to stakeholders</li><li>• Collaborated with cross-functional teams to define project requirements, analyze business problems, and develop data-driven solutions. Conducting ad-hoc analysis and insights to support strategic initiatives and business objectives.</li><li>• Conducted data quality assessments and implemented data governance policies to ensure data accuracy, consistency, and compliance.</li></ul>	Sept. 2021 to Aug. 2022 1 years

- Create complex SQL queries using UNION and UNION ALL, Join's, GROUP BY, WHERE, and HAVING conditions for report and dashboard creation. Optimize SQL queries and create stored procedures, views, functions, and indexes. Created temp tables, CTEs, and variables for data manipulation.
- Having good experience on T-SQL, Microsoft SQL Server Management Studio. Solid knowledge of database management systems and data warehousing concepts.
- Having good knowledge creating Relationships in data model like one-one, one-many, many-one and many-many. Monitoring and validating key metrics insights data from daily report.

## Certifications

---

<b>AWS Solution Architect</b>	In-view
<b>AWS Cloud Practitioner Essentials</b>	2024
<b>Coursea Introduction to Data Analysis using Microsoft Excel</b>	2023
