Professional Summary

Strategic Data Scientist & ML Engineer with 5+ years' experience building predictive models and automating data pipelines that power decision-making. Proven success in leveraging Python, SQL, and cloud platforms to deliver scalable solutions across complex data ecosystems.

Experience

Data Engineer

Quadcore Technologies Limited, Nigeria

Feb. 2019 – Dec. 2023

- Automated and optimized ETL/ELT pipelines using SQL and Python, reducing data processing time by 30% and improving data workflow reliability.
- Engineered scalable data architectures and performed data ingestion across multiple systems, achieving 99%+ data accuracy in production pipelines.
- Developed advanced SQL queries, stored procedures, and indexes to boost reporting performance by 40%, supporting real-time executive dashboards.
- Built dimensional data models (star/snowflake schemas) using Microsoft SQL Server to power analytics across finance and operations.
- Designed and launched interactive dashboards with Power BI and DAX, enabling real-time KPI monitoring and reducing manual reporting hours by 40%.
- Partnered with business units to translate requirements into analytical solutions, increasing operational efficiency by 25%.
- Conducted rigorous data quality assessments, ensuring compliance with internal data governance standards.
- Applied EDA, statistical modeling, and root cause analysis to uncover key business trends and drive process improvements.

Volunteering

Data Analyst

DataKind, Canada

May 2024 – Present

- Leveraged Python, SQL, and Power BI to analyze nonprofit datasets and deliver data-driven strategies, supporting social impact projects.
- Designed visual analytics dashboards for stakeholder reporting, improving decision-making speed by 20%.

Data Analyst

Statistics Without Borders, Canada

Jan. 2024 – Present

- Conducted AI model evaluation and feature engineering for global health projects, enhancing predictive accuracy by 15%.
- Utilized R and cloud-based tools to clean and manage large-scale datasets, supporting high-impact research delivery.

Education

Master of Science, Big Data Analytics

Trent University

GPA: 94/100

Sept. 2023 – Jan. 2025

Peterborough, ON, Canada

Bachelor of Science, Civil Engineering

University of Benin

GPA: 4.5/5.0

Jan. 2013 – May 2017

Benin City, Nigeria

Skills

Programming Languages and Tools: Python, SQL, R, T-SQL, Power BI, Tableau, Excel (VBA), Git, GitHub

Machine Learning and Artificial Intelligence: Scikit-learn, TensorFlow, PyTorch, NLP, Computer Vision, A/B Testing

Big Data and Cloud Platforms: Apache Spark, Hadoop, AWS, GCP, Azure

Database Management: SQL Server, PostgreSQL, MongoDB

Data Pipelines and Modeling: ETL/ELT development, Feature Engineering, Data Modeling (star/snowflake)

Visualization and Reporting: Power BI, Tableau, Plotly, Seaborn, Matplotlib

Soft Skills: Stakeholder Management, Problem-Solving, Attention to Detail, Communication

Courses

AWS Solution Architect

In-view

AWS Cloud Practitioner Essentials

2024

Coursera Introduction to Data Analysis using Microsoft Excel

2023
