## Personal Summary

---

As a skilled data analyst with a strong foundation in statistical methodologies, data mining, AI, and machine learning, I bring expertise in data manipulation, statistical analysis, predictive modeling, and AI-driven solutions. I excel in data collection, cleansing, analysis, and creating insightful visualizations and reports to support data-driven decision-making. My experience includes applying machine learning techniques to derive actionable business insights and delivering real-world solutions through clear and effective communication. I am passionate about leveraging data to drive innovation and contribute to impactful, data-driven projects in a professional setting.

## Skills and Competencies

---

### Technical Skills

---

- Statistical Analysis and Data Modeling:** Advanced proficiency in statistical methods, hypothesis testing, regression analysis, and multivariate analysis.
- Data Management, Security, and Privacy:** Expertise in managing large-scale datasets with a focus on data governance, compliance, and privacy protocols (e.g., GDPR, HIPAA).
- Data Visualization and Interpretation:** Mastery in creating compelling dashboards and visualizations using Power BI, Tableau, and Python libraries (Matplotlib, Seaborn, Plotly) to translate complex data into actionable insights.
- Machine Learning and AI:** Skilled in applying supervised and unsupervised learning, deep learning frameworks (TensorFlow, PyTorch), and model evaluation for predictive and prescriptive analytics.
- Programming and Query Languages:** Proficient in Python, R, SQL, T-SQL, and DAX, with experience in JavaScript, HTML/CSS for web-based visualizations.
- Data Tools and Platforms:** Advanced use of SQL Server, Azure Databricks, SSMS, Snowflake, AWS Redshift, ETL tools (Informatica, Talend), and Apache Spark for big data processing.
- Data Engineering:** Proficiency in building data pipelines, data wrangling, and deploying scalable data architecture solutions.
- Big Data and Cloud Platforms:** Expertise in Azure, AWS, Google Cloud Platform (GCP), and Hadoop for handling large-scale data infrastructure.
- Excel and Advanced Analytics:** Advanced Excel skills including VBA scripting, PivotTables, Power Query, and Solver for complex data analysis and reporting.

### Soft Skills

---

- Communication and Storytelling:** Exceptional ability to convey technical data insights to non-technical stakeholders through storytelling and impactful presentations.
- Team Collaboration and Leadership:** Proven success in cross-functional team environments, mentoring junior analysts, and driving data initiatives to completion.

## Education

|------------|----------------------------------------------------------------------------------------------------------|------------------------|
| <b>MSC</b> | <b>Trent University</b> , Big Data Analytics <ul style="list-style-type: none"><li>GPA: 94/100</li></ul> | Sept. 2023 to Jan 2025 |
| <b>BSC</b> | <b>University of Benin</b> , Engineering <ul style="list-style-type: none"><li>GPA: 4.5/5.0</li></ul>    | Jan. 2013 to May 2017  |

## Experience

---

### **Quadcore Technologies Limited**, Data analyst

Nigeria  
Feb. 2019 to Dec. 2023  
4 years

- Collected, cleaned, and processed large datasets from multiple sources, ensuring 99% data accuracy and reliability for business decision-making.
- Conducted exploratory data analysis (EDA) using statistical methods and data visualization tools, uncovering actionable insights that drove a 25% improvement in operational efficiency.
- Maintained automated ETL pipelines using SQL and Python, reducing data processing time by 30% and streamlining workflows.
- Designed interactive dashboards in Power BI, leveraging DAX functions to track KPIs and present findings to stakeholders, improving reporting efficiency by 40%.
- Partnered with cross-functional teams to identify business problems and deliver data-driven solutions, aligning projects with strategic objectives.
- Conducted data quality assessments and implemented governance policies, ensuring compliance and consistency across datasets.
- Authored and optimized complex SQL queries, including UNION, JOINS, GROUP BY, WHERE, and HAVING clauses, and developed stored procedures, views, and indexes to enhance database performance.
- Demonstrated proficiency in T-SQL, Microsoft SQL Server, and data warehousing concepts, effectively building relationships in data models (one-to-many, many-to-many) to support seamless analysis and reporting.

## Volunteering

---

### **DataKind**, Data analyst

Canada  
May. 2024 to Present

- Collaborated with a cross-functional team to analyze large datasets, identify key trends, and derive actionable insights to support nonprofit initiatives.
- Designed and developed comprehensive reports and visualizations to present findings effectively to stakeholders, driving data-informed decision-making.
- Assisted in data cleaning, preparation, and ensuring the accuracy of datasets for analysis, contributing to impactful social projects.
- Utilized tools such as Python, Power BI, and SQL to create meaningful data narratives that addressed organizational challenges and improved outcomes.

### **Statisticts Without Borders**, Data analyst

Canada  
Jan. 2024 to Present

- Conducted data analysis and prepared comprehensive reports to support projects aimed at improving global health and social outcomes.
- Played a key role in training and fine-tuning AI models to derive insights and improve predictive accuracy for various initiatives.
- Assisted in data preparation, feature engineering, and model evaluation to ensure robust and actionable results.
- Utilized tools such as Python, R, and cloud-based platforms to manage datasets and implement AI solutions tailored to project needs.

## Certifications

---

### **AWS Solution Architect**

In-view

### **AWS Cloud Practitioner Essentials**

2024

### **Coursea Introduction to Data Analysis using Microsoft Excel**

2023
